## WINNING WAYS

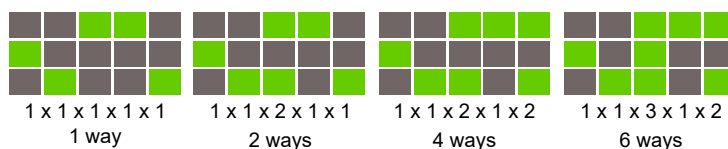

### 243 ways

A combination is considered as winning when a *consecutive sequence of the same symbol appears on several adjacent reels* from the left to the right.

The *number of reels determines the height of the combination*. Only the highest gain per combination of symbols is paid.

If there are several winning identical symbols in the same reel, the number of combinations is *multiplied*.

## "TAKE IT OR NOT" BONUS GAME

Obtain 3 Bonus symbols to launch the *Take It Or Not* bonus.

### How does it work

The *pyramids light up*, one by one, until they stop and make a *proposal*: Receive an *amount of cash*, a *number of WILD symbols* or even the *pyramid "Jackpot"*!

On that moment you have the choice between:

- « *Accept* » the proposal and win the indicated prize. The other proposals will be revealed and the bonus will be closed
  - « *Refuse* » the proposal and relaunch the lottery to try and receive a better prize. The proposal will be removed from the lottery.
  - You can also consult your slot game by choosing the *view button*.
- The game will propose *5 chances to receive the best prize* so follow your instinct and make the right decision. The final proposal will be accepted automatically.

### The different prizes

- The tops of the pyramids offer *Exceptional prizes* which are selected randomly by the lottery.
- The amounts in cash are *credited directly* in your game, in addition to the winnings of your symbol combinations.
- Upon return of the bonus, the « *WILD* » symbols are arranged one by one, randomly, in your grid.
- The *pyramid Jackpot* lets you win the amount of the indicated jackpot and automatically closes the bonus

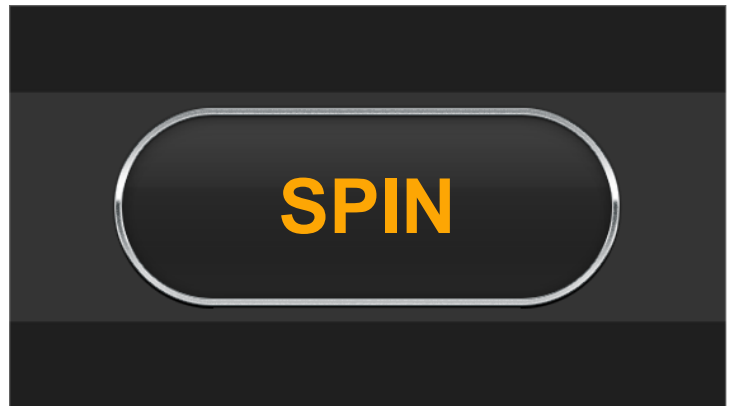

## GENERAL RULES

### Align the symbols and collect your winnings!

A slot consists of a number of *reels* that spin and then stop to make *winning combinations*.

The *paytable* gives an overview of the value and the characteristics of each symbol.

Determine your stake by clicking the - *and* + buttons. Then start the game by clicking the *Spin button*.

## AUTO SPIN MENU

Automatic spins are spins that are played automatically, one after the other, until a stop condition is triggered. These spins are configurable according to the criteria defined below.

### Number of spins

Automatic spin stops as soon as the chosen number of spins has been played.

### Loss Limit (by Bet)

Automatic spin stops if your initial credits decrease by the selected value (by bet).

### Single Win Limit (by Bet)

The automatic spin stops as soon as the winnings on a game reach at least the selected value (by bet).

# JACKPOT

## Jackpot Rules

Winnings linked to jackpots are subject to verification by the casino operator and/or the software provider.

The values displayed in the game are indicative and refreshed every 30 seconds.

When a game triggers a jackpot, that game is blocked for the player and the jackpot is considered won. This jackpot is then reset.

It is impossible to win the same jackpot at the same time. In exceptional cases, the same jackpot system can be won in a short period of time. Two Jackpots will then be distributed, the first with the displayed value, the second with the reset value plus any contributions.

The amount won is rounded up.

The Jackpot can not be won by playing a free demo.

The starting value is 100 X your stake.

## Obtaining and feeding the jackpot

The Jackpot is a progressive jackpot system where a percentage of the stakes feeds the jackpot with each new game.

Each stake is linked to its own jackpot.

2% of the stake feeds the jackpot from which 10% are reserved to feed the starting value of the next Jackpot.
